

Blockchain platform for Telecom Industry

Oleg Pravdin, co-founder

Roaming technology

Convenient for end-users,
unified balance, keeping
domestic phone number

Home operator gets
revenue

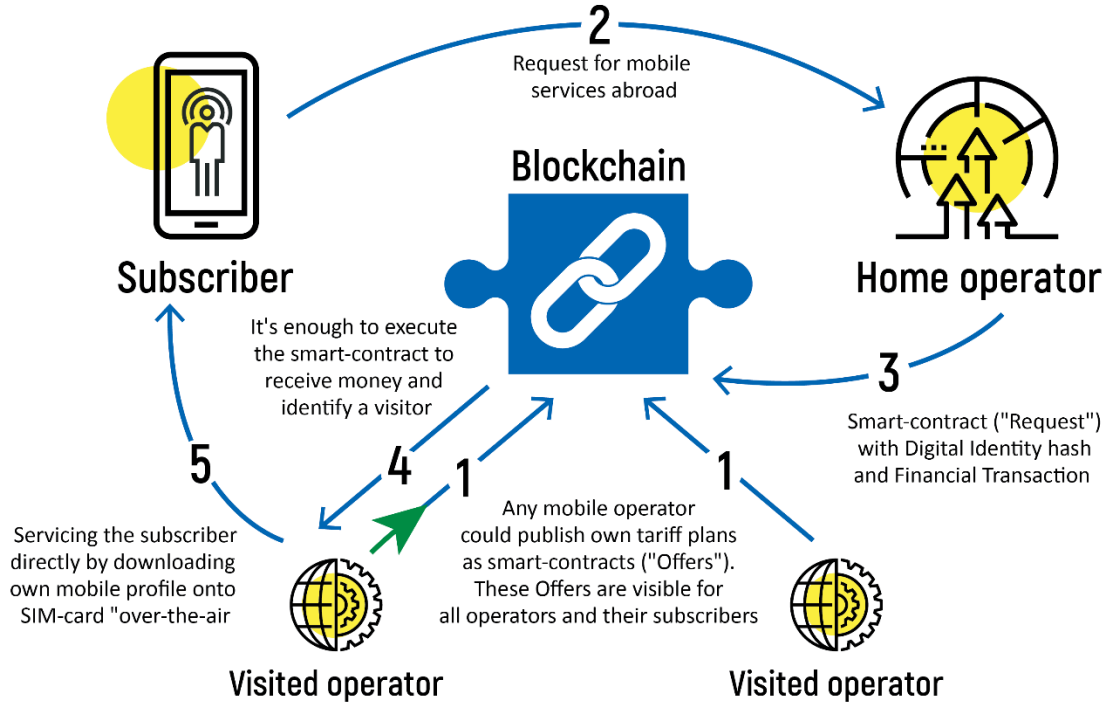

High retail prices

Significant financial
expenses on infrastructure
and commitments, long
period of the technology
implementation

New philosophy of Operators' interactions

Results for operators and subscribers

Subscriber is authorized
Payment is processed
Service is provided
Billing is transparent
Tariffs are local
Quality LTE / LTE+
Zero costs for operator
Quick launch for operator

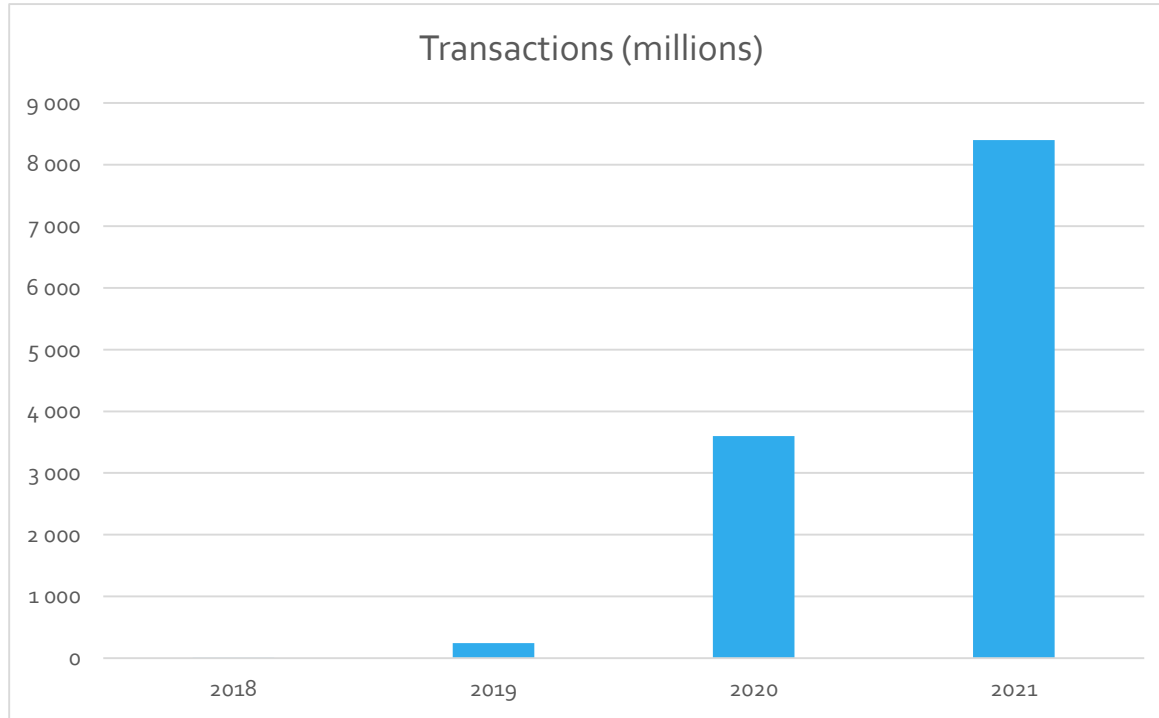

No technical integration or mutual settlements are required. It reduces financial and timing expenses thousands of times.

Easy implementation of value-added services (cloud, music, video, educational, etc.) from multiple service providers

Direct access to 1.2B travelers a year

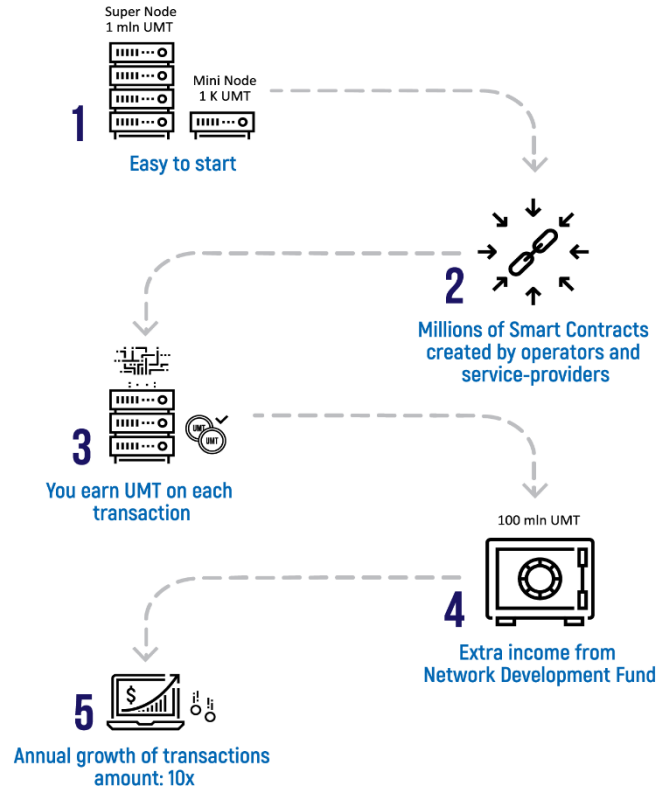

Millions of smart contracts in the nearest future

But who can process them ?

Mining 2.0: processing real smart contracts

**GREAT REVENUE STREAM
FOR EACH CRYPTO-INVESTOR**

More operators &
service-providers

More smart contracts

More activities for Nodes

More revenue for Nodes'
holders

Nodes are becoming
more valuable

Benefits for Investors

- Permanent revenue on smart contracts processing. The more operators and service providers are connected to the Blockchain platform, the more transactions are to be processed, the more income for holders of Nodes
- Our Universal Mobile Tokens (UMT) could be sold on multiple crypto exchanges, could be easily converted to Global Online Tokens to pay for telecom and non-telecom services and could be invested in new Nodes.
- Low risks: our team has 20 years' experience in Telecom industry and has already developed beta-version of the “Bubbletone” app
- Owners of Super Nodes or Virtual Nodes will be granted with Free Global SIM-card with local rates in 80+ countries. The product has been developed by our company and it's ready-to-use.

20 years' experience in Telecom Industry

Active Mobile Virtual Network Operator with 240K premium subscribers

Bubbletone mobile app. Beta-version is available at App Store and Google Play

Global Mobile Data Exchange with local tariffs in 80+ countries

+ 20 engineer in Russia, Bangladesh and Singapore

Combination of technical and commercial expertise in telecom industry

ICO is coming soon

Our market:

1,000+ small and medium-sized operators
10,000 online service-providers
1.2 B travels a year

- ⇒ Billions of smart-contracts to be processed
- ⇒ Expected 10x annual growth

Funding:

220 Super-Nodes * \$250K	\$55M
200K Mini-Nodes * \$250	\$50M
=====	
ICO hard cap	\$105M

Road Map:

Basic “Blockchain in Telecom” platform for telecom operators

Own Remote SIM Provisioning Platform with GSMA certification

Building community of 1,000+ operators, with interaction via Blockchain

Expanding the platform to non-telecom industries, such as cloud services, hotels booking, avia tickets and others

Global Mobile Profile to be pre-installed in 10 B connected mobile devices, including M2M and IoT.

Welcome to the booth **E3-6 Zabeel Hall**
